Cement Paint - New formulation

Application/Uses	: Exterior/interior coating for cement concrete, cement plastered wall, AC sheets, brick work etc. for decorative as well as water resistant purposes
Salient Technical Features	: It has good covering capacity, high water repellancy, easy mixing, better resistance to crazing, map cracking and microbial growth
Environmental Aspects	: No special measures are required
Level/Scale of Development	: Laboratory and field trials conducted
Status of Commercialisation	: 19 licences; Technology in production
Major Components/ Raw Materials	: White cement, pigments, accelerators, water-repellants, hydrated lime, etc.
Major Plant Equipment and Machinery	: Ball mill
Techno-Economics	: A plant of 2 tonne per day (one shift) capacity requires an investment of Rs 22 lakh.
Technology Package	: Specifications of raw materials, plant & machinery, cost economics
